How It Happened.

"It was kinder funny—that is, over-lookin' the seriousness of it," said the landlord of the Pettyville tavern. "You see, Miss Gabriella Lanks, who has not meanin' any disrespect to her, you understand—been an old maid so long that it's generally believed to be chronic, approached the railroad crossin', and a brakeman waved a red flag at her to warn her of the danger. She thought he was tryin' to flirt with her and advanced toward him with a smile, and a caboose that was backin' up struck her good and plenty. Luckily no bones were broken, and the first thing she said when she recovered consciousness was 'Oh, this is so sudden!'" —Smart Set.

Hedgehogs.

Hedgehogs are very strong in the water, swimming with ease against a rapid stream, and with their muscular claws they turn up the nests of trout or salmon and make a goodly haul therefrom. They will breast a very rapid stream, and cold water, as near the freezing point as may be, seems to have no terror for them. The eggs of the salmonidae are a welcome prey to nearly every animal that will face water. Aquatic birds, rats (both house and water), hedgehogs, beetles and their larvae, the so called fresh water shrimp, are deadly foes.

In order to have four rooms on the ground floor, Dr. Smith will move back to his former office on his return.

Misses Mary and Lillian Layson entertained the Social Club, Friday evening with a masquerade Halloween party. The Misses Layson looked quite quaint in dresses of gray silk and white liberty satin, heirlooms of their great-grandmother's. The house presented rather a weird appearance, there being no lights, except "pumpkin devils." The dining table was ornamented with a huge jack-o-lantern—large pumpkins filled with fruit. A unique lunch, consisting of sandwiches, cheese, pickles, doughnuts, cider and grapes, was served. Various Halloween games were indulged in. The costumes were various, the beautiful and ludicrous being represented. About thirty-five persons were in attendance.
